Guidelines to Follow in Making Skirt Sloper

(read carefully)

1. **Measure several favorite skirts you have in your closet and find out the circumference you like.** That measurement will include ease. By measuring the actual garments you like, you will discover what you like and then the sizes on the back of Silhouette patterns are the finished garment measurements, not the body measurements. Make the size according to the finished garment that you like. You may choose from skirt patterns #2050, 2150, 2250, 2350, 2450, 2550, 2650, 2750, 2850, or 2950.
2. Lay out the tissue pattern on muslin and cut out. Add 1" extra at each vertical seam. The purpose of this paper is to save you time and make this easy. Do not read the instructions inside the pattern envelope, do not make changes to the original tissue unless you talk to me first.
3. Mark stitching lines. You are to baste on the original stitching lines.
4. Baste darts, if applicable. **Do not backstitch.**
5. Machine baste, all seams. **Do not backstitch.**
6. You're done!! **Approx.** cutting and sewing time: 1 hours.

Class Supplies:

Pins, scissors, french curve, and misc. sewing notions, **and the muslin skirt sloper.**
